State Energy Data System CSV File Documentation

Prices and Expenditures

The State Energy Data System (SEDS) comma-separated value (CSV) files contain the price and expenditure estimates shown in the tables located on the SEDS website.

There are three files that contain estimates for all states and years. Prices contains the price estimates for all states and Expenditures contains the expenditure estimates for all states. The third file, Adjusted Consumption for Expenditure Calculations contains adjusted consumption estimates used in calculating expenditures (see Appendix E below). Zip files are also available for the large data files. In addition, there is a CSV file for each state, named with the two-letter U.S. Postal Code listed in Appendix A, as well as a file for the United States.

The first record in each file serves as a column heading and contains information about data in each of the following records. Each data file record that follows begins with the state code (2 characters), followed by the data identifier (5 character mnemonic code, or MSN), followed by the 42 values for the years 1970 through 2011, with all items separated by commas. All items are enclosed in quotes, which means some systems will read numeric values as alphanumeric unless they are converted. Each file contains SEDS prices in dollars per million British thermal units (Btu) and expenditures in million dollars.

Price estimates contained in these CSV files are rounded to two decimal places, and expenditure estimates are rounded to one decimal place. Adjusted consumption estimates are rounded to whole numbers in billion Btu, and conversion factors, percentages, and ratios are rounded to three decimal places. The precision does not necessarily reflect the statistical accuracy of the numbers. Users should see the sources cited in the SEDS Price and Expenditure Technical Notes for a discussion of statistical considerations concerning specific data series. Electric power sector fuel expenditures, shown as negative numbers in tables on expenditures by source, are stored as positive numbers in the data files.

The data files contain additional data series not shown in the report tables that have frequently been requested by customers. These additional data include the individual petroleum products in "Other Petroleum Products" used in the industrial sector.

Expenditure estimates are calculated as the product of the price and consumption estimates. The consumption estimates are also from SEDS and cover 1960 through 2011. A discussion of the consumption estimation methodologies is contained in the SEDS Consumption Technical Notes. Consumption estimates used in the price and expenditure tables are not always identical to those contained in the consumption data tables. Section 7: Consumption Adjustments for Calculating Expenditures in the Price and Expenditure Technical Notes explains the adjustments.

In addition to the cross-tabulation CSV files, there is a consolidated data file containing over 1.4 million records of the complete set of SEDS production, consumption, price, and expenditure estimates. Users can download the zip file or the CSV file for further processing.

The following appendices explain the data identification codes used in the files. Appendix A lists the state codes. Appendix B is a list of the components of the key variables and definitions of the various characters. A copy of the column headings used in the SEDS price and expenditure tables is contained in Appendix C with the associated names of the key variables. Appendix D shows individual petroleum products covered under "Other Petroleum" in the price and expenditure tables. Appendix E identifies the process fuel and intermediate product consumption variables and the adjusted consumption variables used in expenditure calculations.

List of Appendices	
A	State Codes
B	Data Identification Codes (MSN)
C	Table column headings and variable names
D	Other Petroleum
E	Consumption Adjustments for Calculating Expenditures

The price and expenditure estimates contained in SEDS and the methodologies used to derive them are described in the SEDS Price and Expenditure Technical Notes.

Contacts:

The State Energy Data System tables were prepared by the Integrated Energy Statistics Team of the Office of Survey Development & Statistical Integration, U.S. Energy Information Administration. Questions concerning the contents of the State Energy Data System or these files may be referred to Yvonne Taylor, 202-586-1455, or yvonne.taylor@eia.gov.

Appendix A

U.S. Postal State Codes							
Code	Name	Code	Name	Code	Name	Code	Name
AK	Alaska	DE	Delaware	KS	Kansas	MO	Missouri
AL	Alabama	FL	Florida	KY	Kentucky	MS	Mississippi
AR	Arkansas	GA	Georgia	LA	Louisiana	MT	Montana
AZ	Arizona	HI	Hawaii	MA	Massachusetts	NE	Nebraska
CA	California	IA	Iowa	MD	Maryland	NC	North Carolina
CO	Colorado	ID	Idaho	ME	Maine	ND	North Dakota
CT	Connecticut	IL	Illinois	MI	Michigan	NH	New Hampshire
DC	District of Columbia	IN	Indiana	MN	Minnesota	NJ	New Jersey
NM	New Mexico	OR	Oregon	TN	Tennessee	WA	Washington
NV	Nevada	PA	Pennsylvania	TX	Texas	WI	Wisconsin
NY	New York	RI	Rhode Island	UT	Utah	WV	West Virginia
OH	Ohio	SC	South Carolina	VA	Virginia	WY	Wyoming
OK	Oklahoma	SD	South Dakota	VT	Vermont	US	United States

Appendix B

The 5-letter identifier (MSN) is a SEDS variable name defined as follows:

Data Identification Codes (MSN)	
Characters	**Identity**
1 and 2	represent an energy source
3 and 4	represent an energy consumption sector or an energy activity
5	represents a type of data

Energy Source (Characters 1 and 2)	
Code	**Name**
AR	asphalt and road oil
AV	aviation gasoline
CC	coal coke
CL	coal
DF	distillate fuel oil
DK	distillate fuel oil, including kerosene-type jet fuel
ES	electricity sales
EL	electricity (imports/exports)
FN	petrochemical feedstocks naphtha less than 401 degrees F.
FO	petrochemical feedstocks other oils equal to or greater than 401 degrees F.
FS	feedstocks still gas
JF	jet fuel
KS	kerosene
LG	liquefied petroleum gases
LU	lubricants
MG	motor gasoline
MS	miscellaneous petroleum products
NG	natural gas (including supplemental gaseous fuels)
NU	nuclear electric power

P1	asphalt and road oil, aviation gasoline, kerosene, lubricants, and "other petroleum products"
PA	all petroleum products
PC	petroleum coke
PE	primary energy
PO	other petroleum products
RF	residual fuel oil
SN	special naphtha
TE	total energy
WD	wood
WS	biomass waste
WW	wood and biomass waste
WX	waxes

The following codes represent the four end-use consuming sectors, electric utilities, and total energy price and expenditures:

Energy Consumption Sectors (Characters 3 and 4)	
Code	Name
AC	transportation sector estimates
CC	commercial sector estimates
EI	electric power sector estimates
IC	industrial sector estimates
RC	residential sector estimates
TC	total energy sector estimates
TX	total end-use estimates

The following codes represent energy activities, other energy-consuming sectors, and derived concepts:

Energy Activities (Characters 3 and 4)	
Code	Name
AS	transportation consumption, costed
CS	commercial consumption, costed
EG	electricity, net generation

4

EX	exports
IM	imports
IS	industrial consumption, costed
KC	coke plant consumption
NI	net imports
OC	industrial consumption, excluding coke plants
OS	industrial consumption, excluding coke plants and process fuel
PF	process fuel consumption
PZ	natural gas consumed as pipeline fuel
RF	refinery fuel consumption
RS	refinery fuel consumption, costed
TP	energy expenditures per capita
XC	total consumption, excluding coke plants and process fuel

Types (Character 5)	
Code	**Name**
B	data in billion British thermal units (Btu)
D	price in dollars per million Btu
V	expenditures in million dollars
S	percentage

Other SEDS variables that do not follow this convention include:

Code	Name
TPOPP	resident population
GDPRV	current-dollar gross domestic product
TEGDS	energy expenditures as percent of current-dollar gross domestic product

Appendix C

The following section lists the SEDS variables in the order they appear in the price and expenditure tables. Each table column contains one variable.

Appendix D

Other Petroleum

In the Total Energy, Total End-use, and Industrial Sector tables, "Other Petroleum" includes asphalt and road oil, aviation gasoline, kerosene, lubricants, and "other petroleum products" as described in Section 4 of the Price and Expenditure Technical Notes. Data for the detailed products are available in the CSV file.

Components of P1TCD/V
ARTCD/C
AVTCD/C
KSTCD/C
LUTCD/C

POTCD/C, which includes:
FNTCD/V
FOTCD/V
FSTCD/V
PCTCD/V
SNTCD/V
WXTCD/V
MSTCD/V

Components of P1TXD/V
ARTXD/C
AVTXD/C
KSTXD/C
LUTXD/C
POTXD/C, which includes:
FNTXD/V
FOTXD/V
FSTXD/V
PCTXD/V
SNTXD/V
WXTXD/V
MSTXD/V

Components of P1ICD/V
ARICD/V
KSICD/V
LUICD/V
POICD/V, which includes:
FNICD/V
FOICD/V
FSICD/V

PCICD/V
SNICD/V
WXICD/V
MSICD/V

Appendix E

Consumption Adjustments for Calculating Expenditures

To calculate energy expenditures, SEDS consumption is adjusted to remove quantities of process fuel, intermediate products, renewable energy consumption that has no direct fuel cost, and other adjustments. All such series are included in these files are in a CSV file named Adjusted Consumption for Expenditure Calculations. Not all associated SEDS consumption variables are displayed here, but they are available on the SEDS files. The most recent year's estimates are shown in Tables TN60 and TN61, in Section 7 of the SEDS Price and Expenditure Technical Notes.

Consumption Variables	
Code	**Description**
CLOSB	Industrial coal consumption, excluding coke plants and processing fuel
CLRFB	Coal used at refineries
COICB	Industrial crude oil consumption in petroleum industry operations
DFISB	Industrial distillate fuel oil consumption, costed
DFRFB	Distillate fuel oil used at refineries
EMLCB	Energy losses and co-products from the production of fuel ethanol
ESISB	Industrial electricity consumption, costed
ESRFB	Electricity used at refineries
GECCB	Commercial geothermal energy consumption
GEICB	Industrial geothermal energy consumption
GERCB	Residential geothermal energy consumption
HYCCB	Commercial hydropower consumption
HYICB	Industrial hydropower consumption
LGISB	Industrial liquefied petroleum gases consumption, costed
LGRFB	Liquefied petroleum gases used at refineries

LOTCB	Electrical system energy losses
NGISB	Industrial natural gas consumption, costed
NGLPB	Natural gas lease and plant fuel consumption
NGPZP	Natural gas pipeline consumption
NGRFB	Natural gas used at refineries
P5RFB	Other petroleum used at refineries
PCISB	Industrial petroleum coke consumption, costed
PCRFB	Petroleum coke used at refineries
RFISB	Industrial residual fuel oil consumption, costed
RFRFB	Residual fuel oil used at refineries
SFCCB	Commercial supplemental gaseous fuel consumption
SFICB	Industrial supplemental gaseous fuel consumption
SFRCB	Residential supplemental gaseous fuel consumption
SOCCB	Commercial photovoltaic and solar thermal energy consumption (excluding SOHCB)
SOHCB	Residential, commercial, and industrial photovoltaic and solar thermal energy consumption
SOICB	Industrial photovoltaic and solar thermal energy consumption (excluding SOHCB)
TEPFB	Total energy used as process fuel
TERFB	Total energy used at refineries
TETCB	Total energy consumption
TNSCB	Total adjusted consumption
WDCSB	Commercial wood consumption, costed
WDRSB	Residential wood consumption, costed
WDRXB	Residential wood at no cost
WWCSB	Commercial wood and biomass waste consumption, costed
WWCXB	Commercial wood and biomass waste consumption at no cost
WWISB	Industrial wood and biomass waste consumption, costed
WWIXB	Industrial wood and biomass waste at no cost
WYCCB	Commercial wind energy consumption
WYICB	Industrial wind energy consumption
